

SCOPE OF WORK

Farm-to-Customer Supply Chain & Order Fulfillment Application Development

Scope of Work (SOW)

Farm-to-Customer Supply Chain Management Application

Project Overview

The proposed solution is a centralized web and mobile-based application designed to digitize the sales, inventory, order fulfillment, dispatch, and delivery operations of SVV Balaji Food & Beverages Pvt. Ltd. The application will provide end-to-end visibility of customer orders, inventory, batch traceability, warehouse operations, and product delivery while supporting procurement and production processes for complete supply chain traceability.

1. User & Role Management

Develop a secure authentication system with role-based access for different users, enabling controlled access to application modules based on responsibilities.

Scope Includes

- Secure Login & Authentication
- Role-Based Access Control
- User Profile Management
- Permission Management
- Activity Logs

SCOPE OF WORK

A circular cluster of colorful icons representing various business and technology concepts, with a hand cursor pointing at one of them.

Farm-to-Customer Supply Chain & Order Fulfillment Application Development

2. Customer & Sales Management

Develop a centralized customer management system for maintaining distributors, retailers, institutional buyers, and direct customers.

Scope Includes

- Customer Registration
- Distributor & Retailer Management
- Customer Profile Management
- Customer Address Management
- Customer Order History
- Customer-wise Pricing (if applicable)

3. Product & Inventory Management

Develop an inventory management system capable of maintaining batch-wise stock and product availability across warehouses.

Scope Includes

- Product Master
- Product Categories
- Warehouse Management
- Batch-wise Inventory
- Real-Time Stock Availability
- Stock Reservation
- Low Stock Alerts

4. Order Management

Develop a complete order processing system allowing sales teams and administrators to create, manage, approve, and monitor customer orders.

SCOPE OF WORK

Farm-to-Customer Supply Chain & Order Fulfillment Application Development

Scope Includes

- Online & Offline Order Entry
- Order Creation & Modification
- Product Selection
- Quantity Management
- Order Approval Workflow
- Order Status Tracking
- Customer Order History

5. Inventory Verification & Batch Allocation

Develop an automated inventory verification system that validates stock availability and allocates appropriate product batches before order processing.

Scope Includes

- Stock Verification
- Batch Availability Check
- FIFO / FEFO Batch Allocation
- Batch Reservation
- Manual Batch Override
- Batch History

6. Picking & Packing Management

- Develop warehouse operations modules for efficient order preparation prior to dispatch.
- Scope Includes
- Picking List Generation
- Warehouse Location Mapping
- Rack-wise Picking

SCOPE OF WORK

A circular icon containing various symbols related to supply chain and order fulfillment, such as a shopping cart, a truck, a warehouse, and a person. The icon is surrounded by a ring of smaller, colorful circles.

Farm-to-Customer Supply Chain & Order Fulfillment Application Development

- Batch-wise Picking
- Packing Confirmation
- Packing Slip Generation
- QR/Barcode Label Generation

7. Invoice & Billing Management

Develop a billing system for generating tax-compliant invoices and shipment documents.

Scope Includes

- GST Invoice Generation
- Tax Calculation
- Invoice Number Generation
- Delivery Challan
- Packing Slip
- PDF Invoice Generation
- Invoice Sharing via Email/WhatsApp

8. Dispatch Management

Develop a dispatch management module for planning and monitoring outgoing shipments.

Scope Includes

- Shipment Creation
- Vehicle Allocation
- Driver Assignment
- Dispatch Scheduling
- Dispatch Confirmation
- Dispatch History

Farm-to-Customer Supply Chain & Order Fulfillment Application Development

9. Delivery Management

- Develop a delivery tracking system enabling delivery teams to manage assigned deliveries and confirm successful deliveries.
- Scope Includes
 - Delivery Assignment
 - Delivery Status Updates
 - Customer Signature Capture
 - Photo Proof of Delivery
 - OTP Verification (Optional)
 - Failed Delivery Recording
 - Return Management

10. Order Tracking

Develop an end-to-end order tracking system providing real-time visibility throughout the fulfillment lifecycle.

Scope Includes

- Order Received
- Inventory Verified
- Batch Allocated
- Picking Completed
- Packing Completed
- Invoice Generated
- Dispatched
- Delivered

A circular cluster of colorful icons representing various business and technology concepts, including a shopping cart, a person, a gear, a document, and a network. A hand is shown pointing at the cluster.

Farm-to-Customer Supply Chain & Order Fulfillment Application Development

11. Reports & Dashboard

Develop a centralized dashboard for monitoring sales, inventory, warehouse, and delivery performance.

Scope Includes

- Sales Reports
- Order Reports
- Inventory Reports
- Dispatch Reports
- Delivery Reports
- Pending Orders
- Revenue Dashboard
- MIS Reports
- Excel/PDF Export

12. QR Code & Batch Traceability

Develop a traceability system allowing complete tracking of each product batch from procurement to customer delivery.

Scope Includes

- QR Code Generation
- Batch Identification
- Manufacturing Details
- Warehouse Details
- Dispatch Information
- Delivery History

Farm-to-Customer Supply Chain & Order Fulfillment Application Development

13. Supporting Modules (Limited Scope)

To support the sales and fulfillment process, the application will also include basic operational modules for procurement, production, and quality records.

Scope Includes

- Farmer/FPO Master
- Procurement Records
- Raw Material Batch Creation
- Production Batch Entry
- Finished Goods Entry
- Basic Quality Inspection Records
- Customer Feedback & Complaint Management

Project Deliverables

Web Admin Panel

- Secure Admin Portal
- Dashboard & Analytics
- User & Role Management
- Customer Management
- Product & Category Management
- Warehouse Management
- Inventory Management
- Batch Management
- Order Management
- Invoice Management
- Dispatch Management
- Delivery Management
- Reports & MIS
- System Settings

SCOPE OF WORK

Farm-to-Customer Supply Chain & Order Fulfillment Application Development

Android Mobile Application

Sales Executive App

- Customer Management
- Order Creation
- Order Status Tracking
- Invoice Sharing
- Customer History

Warehouse App

- Batch Verification
- Inventory Update
- Picking Management
- Packing Management
- QR/Barcode Scanning

Delivery Executive App

Assigned Deliveries

Delivery Route

Order Status Update

Customer Signature

Photo Upload

Delivery Confirmation

Core Functional Deliverables

- Role-Based User Access
- Customer & Distributor Management
- Product & Inventory Management
- Batch-wise Inventory Control
- Order Management System
- Inventory Verification Engine
- Batch Allocation System

SCOPE OF WORK

Farm-to-Customer Supply Chain & Order Fulfillment Application Development

Picking & Packing Workflow

GST Invoice Generation

Dispatch Management

Delivery Tracking

Order Status Tracking

QR Code-Based Batch Traceability

Customer Feedback & Complaint Module

Dashboard & MIS Reports

Export to Excel/PDF

Email & Notification Support

Supporting Functional Deliverables

Farmer Master Management

Procurement Record Management

Production Batch Records

Finished Goods Inventory

Basic Quality Check Records

Technical Deliverables

- Responsive Web Application
- Android Mobile Applications
- Centralized Database
- Secure Role-Based Authentication
- REST API Integration
- QR Code Integration
- Deployment on Client Server
- User Training & Knowledge Transfer

SCOPE OF WORK

Farm-to-Customer Supply Chain & Order Fulfillment Application Development

Enhanced Farm Management Module

Farmer Registration & Unique Farmer ID

- Farmer Registration & Profile Management
- Unique Farmer ID Creation
- Farm Details & Land Information
- Crop Registration
- Farmer Document Management
- Farmer History & Activity Tracking

Farm Training & Crop Planning

Features

- Farmer Training Management
- Training Session Scheduling
- Attendance & Participation Records
- Crop Planning Calendar
- Seasonal Crop Planning
- Cultivation Schedule
- Harvest Planning
- Advisory & Best Practices Management

Batch Management

Features

- Automatic Batch Number Creation
- Raw Material Batch Generation
- Production Batch Creation
- Batch Status Management
- Batch-wise Production Tracking
- Batch Traceability

SCOPE OF WORK

Farm-to-Customer Supply Chain & Order Fulfillment Application Development

Warehouse & Storage Management Features

- Batch-wise Storage Identification
- Warehouse Allocation
- Rack/Bin Location Management
- Storage Zone Identification
- Batch Movement Tracking
- Storage History
- Stock Availability by Batch

Packaging & QR Code Management Features

- Packing Management
- Batch-wise Packing
- Packing Quantity Verification
- Batch Number Printing
- QR Code Generation for Every Batch
- QR Code Label Printing
- Product Traceability through QR Code

QR Code Information:

Farmer Details

Farmer ID

Crop Details

Procurement Date

Batch Number

Manufacturing Date

Packaging Date

Warehouse Details

Expiry Date (if applicable)

SCOPE OF WORK

Farm-to-Customer Supply Chain & Order Fulfillment Application Development

Customer Feedback & Complaint Management Features

- Customer Feedback Collection
- Product Rating
- Customer Reviews
- Complaint Registration
- Complaint Resolution Tracking
- Product Quality Feedback
- Customer Satisfaction Reports

Updated Farm-to-Customer Workflow

Farmer Registration → Unique Farmer ID → Farm Training → Crop Planning → Procurement → Batch Number Creation → Batch-wise Warehouse Storage → Processing → Packing → Batch Number & QR Code Generation → Sales → Order Fulfillment → Delivery → Customer Feedback & Complaint Management
