

SVV Balaji Food & Beverages Pvt. Ltd. — Revised SOW Confirmation Checklist

Vendor: Appzeto / Budgetaddaa E-commerce Services Pvt. Ltd. | Quote #0001789 dated 06-Jul-2026 | Project: Farm-to-Customer Supply Chain Mgmt Application | Vendor must BEFORE advance is released.

#	Zone / Module	Requirement to be Confirmed	In Current Quote?	Required Amendment / Clarification	Priority
SECTION A — TRACEABILITY & CORE ARCHITECTURE (Farm-to-Fork)					
1	Architecture	End-to-end batch genealogy linked as ONE chain: Farmer ID > Raw-material batch > Process/Production batch > Finished-goods batch > Order > Delivery	Partial	Confirm DB schema is designed for full parent-child batch linkage from Day 1, even if some entry screens are phased later. No retrofit.	Critical
2	Zone 3 (Pkg)	Packaging QR must display: Farmer, Farm Location, Batch No., Manufacturing details, and Process Video	Partial	Confirm QR data model supports ALL these fields incl. video link. Quote lists QR but not farm-origin fields.	Critical
3	Hosting	Storage for QR process videos, delivery photos & QR assets	No / VPS only	Add S3-compatible object storage + CDN + automated DB backups. Single Hostinger KVM-1 (also EXCLUDED from price) cannot scale for video.	Critical
SECTION B — ZONE 1: FARM SOURCING & PLANNING (currently 'Limited Scope')					
4	Zone 1	Unique Farmer / Traceability ID creation	No	Add — this ID is the anchor of the whole QR traceability promise.	Critical
5	Zone 1	Farmer / FPO Master	Yes	Confirm included (listed as supporting module).	High
6	Zone 1	Pre-season rate, quality & quantity agreement record	No	Add master/record screen.	High
7	Zone 1	Certified seed & crop-input support tracking	No	Add — or confirm explicitly out-of-scope in writing.	Medium
8	Zone 1	Farmer training & crop-planning records	No	Add — or confirm phased.	Medium

9	Zone 1	Periodic field supervision / crop-monitoring log	No	Add — or confirm phased.	Medium
SECTION C — ZONE 2 & 3: PROCUREMENT & PROCESSING					
10	Zone 2	Pre-harvest quality check record	Partial	Confirm 'Basic Quality Inspection' covers pre-harvest check.	Medium
11	Zone 2	Raw-material collection + Raw-material batch creation at store	Partial	Confirm batch number auto-generated on receipt & segregated storage flag.	High
12	Zone 3	Multigrain Atta processing: recipe/ratio (BOM), weigh-per-ratio, blending, homogeneity check	No	Add formula/ratio-based batch production. Quote only has generic 'Production Batch Entry'.	Critical
13	Zone 3	Single-grain processing (milling/grinding/oil/roasting/spice) batch entry	Partial	Confirm production batch entry supports per-product-type processing.	Medium
14	Zone 3	Cleaning, grading & in-process + finished-product QC records	Partial	Confirm 'Basic Quality Check Records' covers in-process AND finished QC.	Medium
SECTION D — ZONE 4: SALES, ORDER FULFILMENT & DELIVERY					
15	Zone 4	Order channels: Amazon / Flipkart / Website / WhatsApp / Own App	No (B2B only)	CLARIFY IN WRITING: quote delivers only Sales-Exec app + Admin. No customer storefront, no marketplace integration, no payment gateway. Confirm scope now vs	Critical
16	Zone 4	Customer-facing D2C app / website + payment gateway	No	Timeline mentions 'payment gateways' but scope has none. Confirm inclusion/exclusion & price.	High
17	Zone 4	GST invoice generation	Yes	Confirmed included.	High
18	Zone 4	E-Invoicing (IRN / IRP) + E-Way Bill generation	No	Add — mandatory GST compliance for dispatch. Not currently scoped.	Critical
19	Zone 4	Inventory verification + FIFO/FEFO batch allocation + reservation	Yes	Confirmed included.	High

20	Zone 4	Picking, packing, QR/barcode label generation	Yes	Confirmed included.	Medium
21	Zone 4	Dispatch (vehicle/driver/schedule) + Delivery tracking	Yes	Confirmed included.	Medium
22	Zone 4	Delivery OTP verification	Optional	Make MANDATORY, not optional.	High
SECTION E — ZONE 5 + REPORTING					
23	Zone 5	Customer feedback + complaint handling & corrective action	Yes	Confirmed included.	Medium
24	Zone 5	Farmer & product performance review	Partial	Confirm reporting links back to farmer/product for continuous improvement.	Medium
25	Reports	Dashboard, MIS, Sales/Inventory/Dispatch/Delivery reports, Excel/PDF export	Yes	Confirmed included.	Medium
SECTION F — NON-FUNCTIONAL / FUTURE EXPANSION (bake in now)					
26	Future	API-first / open REST APIs for future integrations (marketplace, Tally/ERP accounting, payment gateway, logistics aggregator, weighbridge/IoT)	Partial	Confirm REST APIs are genuinely open & documented, not internal-only.	Critical
27	Future	Multi-warehouse & multi-location support	Partial	Confirm architecture supports multiple warehouses/locations.	High
28	Future	Extensible role & permission model	Yes	Confirm new roles/permissions can be added without code change.	Medium
29	Future	Regional / multi-language support (farmer-facing screens)	No	Confirm language framework in place for future rollout.	Medium
30	Future	Official WhatsApp Business API (not unofficial gateway)	Unclear	Confirm approved WhatsApp Business API is used.	High

31	Future	Scalable DB schema for growing batch/product/order volume	Partial	Confirm schema/indexing scales without redesign.	High
SECTION G — SECURITY & DATA					
32	Security	Role-based auth, activity/audit logs, password policy	Yes	Confirmed included.	High
33	Security	Automated backups + disaster recovery plan	No	Add scheduled DB backups & documented DR.	High
34	Security	PII handling for farmers & customers (GST/contact data)	Unclear	Confirm data-privacy handling & access controls.	Medium
35	Data	Migration/import of existing customer & product masters	No	Add data migration to scope + provide import templates.	High

Clarification for point - 6

Pre-season rate, quality & quantity agreement record

Clarification: Agreement master screen will be provided.

Storage services and associated charges will be the client's responsibility.

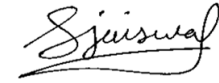

Clarification: Cloud storage and related costs will be borne by the client.

Clarification for point - 9

Comment: Included in scope.

Clarification: Field visit and crop monitoring logs will be maintained in the system. ✓

Clarification for point 30 -
Official WhatsApp Business API
Pricing: Approx. ₹1,500-₹5,000/month (provider dependent) + Meta message charges (Utility ~₹0.12/message, Marketing ~₹0.86/message). API subscription and message charges will be borne by the client.

A handwritten signature in black ink, appearing to read 'S. Jaiswal', with a horizontal line underneath.
